PROFESSIONAL SUMMARY

AI Automation Specialist and Computer Science student with hands-on experience building production-grade n8n workflows, multi-agent AI systems, and API integrations from scratch. Proficient in integrating Claude, OpenAI, and Gemini into real automation pipelines — including a Telegram-based multi-agent system with persistent PostgreSQL memory and a fully automated meeting-to-task workflow. Capable of delivering end-to-end automations independently, often within a single day. Actively seeking remote opportunities where I can design and build intelligent automation systems that eliminate manual work.

TECHNICAL SKILLS

Automation & Integration: n8n (multi-agent orchestration, webhook triggers, sub-agents, API nodes), REST APIs, webhooks

AI / LLM Integration: Claude API, OpenAI API, OpenRouter, Google Gemini, Ollama, prompt engineering

Programming: Python, JavaScript, TypeScript, Java, C, React JS, HTML, CSS, Tailwind CSS

Databases: PostgreSQL, Supabase, MySQL (schema design, persistent memory, query optimization)

Tools & Platforms: Google Workspace (Gmail API, Calendar API, Sheets, Drive), Slack, Monday.com, Notion, Telegram, Git

PROJECTS

Jarvis AI Agent — Multi-Agent Automation System | n8n, Claude API, OpenAI, Telegram, PostgreSQL, Google Workspace, ElevenLabs 2025

- Architected a multi-agent AI system on Telegram using n8n, orchestrating specialized sub-agents for Gmail (read, draft, send, summarize) and Google Calendar (create, update, delete events) via natural language commands.
- Integrated Claude API for intelligent task routing, PostgreSQL for persistent conversation memory, Google Sheets for contact lookup, and ElevenLabs for voice responses — built entirely from scratch.

Meeting Automation — Google Meet → Slack & Monday.com | n8n, OpenAI API, Google Drive, Slack API, Monday.com 2025

- Built a dual-pipeline n8n automation that processes Google Meet recordings automatically: one pipeline generates AI meeting summaries posted to Slack; the other extracts action items and creates Monday.com tasks — zero manual effort.

Sales Tracker & Receipt Processor Bots | n8n, Telegram Bot API, OpenAI Vision, Google Sheets API, Google Drive API 2025

- Developed two production Telegram bots: one uses AI image recognition to digitize handwritten sales records and generate financial reports with CSV export; the other auto-extracts receipt data via AI vision and logs to Google Sheets and Drive.

OLFU Academic Hub | React, TypeScript, Supabase, PostgreSQL, Google OAuth 2024

- Built a full-stack academic platform from scratch with XP gamification, leaderboards, program rooms, and Google Sign-In restricted to school email domains.

CERTIFICATIONS

Advanced Learning Algorithms — DeepLearning.AI & Stanford University (Coursera) Apr 2026

Supervised Machine Learning: Regression & Classification — DeepLearning.AI & Stanford (Coursera) Mar 2026

EDUCATION

Bachelor of Science in Computer Science — Our Lady of Fatima University 2024 – 2028

GWA: 1.24 | Dean's List (2nd Year, 1st Semester)

Senior High School — STEM Strand — Our Lady of Fatima University Graduated 2024

AWARDS

Champion — Python Programming Competition, CCS Week, OLFU

2nd Place — ADET Arduino Competition, CCS Week, OLFU
